

## Leon Boey, Designer

Leon Boey is a Designer with Cognitive Edge, tasked with the new SenseMaker 3.0 interface and development. He also works on the Cognitive Edge website and newsletter, and other projects such as the Flash interfaces for the Collector system, and any Cognitive Edge project that requires a design focus and a keen eye. He has been an accredited Cognitive Edge practitioner since 2008.

Prior to his current role with Cognitive Edge, Leon has started a design company, an Internet development company and worked as a Studio Manager at a local advertising agency. He was on the original team that designed the Cognitive Edge corporate identity and website, along with the SenseMaker Suite branding and website.

Leon's goal is to help to develop new visualisation tools for the SenseMaker Suite, while bringing the interface up to a more usable and intuitive level, enabling greater sensemaking abilities in users. When not working on SenseMaker and thinking about new cool visualisations, Leon teaches scuba diving and travels frequently to remote tropical islands to explore the reefs and wrecks under the sea.

Leon graduated from the National University of Singapore's School of Computing with a Bachelors in Computer Science. He also has his Microsoft Certified System Engineer (MCSE) certification.
